

Noah, the Ark and the Animals by Our 2018 Celebration Class

God told Noah to build an Ark to save all the animals. Noah built the Ark. His Mom & Dad helped build some of the animals and his family built it too. The people in the city and world were bad all around, not listening and shared nothing. Noah was a good person. He was nice and respectful to God. That was the "instructions". Noah used wood and glue to build the Ark. He worked very hard for a longer time to build the animals. They needed water and food too. He got all the animals, one boy and one girl. It rained (thunder) for 40 days and 40 nights. Then a flood came and washed everything away. All the animals got away, but not the animals that would eat the other. Because cats eat mice, maybe Noah put a small cage there so they would not eat the mice by hiding them from the cats. The rain stopped. He let the black bird free. He waited, but it did not come back. His job was to find a tree, but he didn't. The white bird came back with a worm and went to the tree. Noah opened the Ark for the animals to come out. A rainbow was in the sky. God said, "I will never again send a flood to destroy the earth. When you see a rainbow, that reminds us what God said."
